Profile

My name is Vladislav, i am 20 years old. Learning front-end technology about one year. I consider myself as a Junior front-end developer. I want to achieve great success in this case, for this i am learning new technologies, reading interesting articles, taking online courses. Junior is one of the steps to Middle front-end developer, for this i am learning JavaScript. Created layouts for myself, to improve my knowledge in practice. I want to learn a JavaScript frameworks in the future. I want to realize my projects and my ideas in the future.

Employment History

All my experience consists of projects, which I found on the Internet and developed them, to get some experience and understand how to develop websites. In my developments you can see the growth of projects, from simple projects, to projects with:

- Semantic layout
- BEM methodology
- Preprocessor Sass
- Task runner Gulp
- Adaptive and Responsive layout
- JavaScript codes

All my projects you can see in my [Github](#) account.

Also i have my personal website [Me Portfolio](#).

Education

Odessa Technical College of the Odessa National Academy of Food Technologies, Odessa

September 2015 — June 2019

Studied in the specialty "Computer Engineering". As a result of received the Diploma "Junior Specialist". I did ptactice at the [Odessa Port Plant](#), as a computer specialist for two months.
